DETAILED ACTION

Allowable Subject Matter

1. Claim 1-11, 13-17, 20, 21 and 23-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for reserving resources in a heterogeneous MPLS network where enhanced MPLS and non-enhanced MPLS protocols are used. The prior arts in the record fail to teach or make obvious to a method comprising when a new resource is required for the established Label Switching Path, employing the second type of message to reserve the resources at routers employing EMPLS protocol and using the first type of message to establish a new path including the routers employing MPLS protocol within a structure of the claim. These features are claimed in the independent claims 1 and 25 and render them allowable. The prior arts in the record, also, fail to teach or make obvious to a method comprising when a change of resources requirement has occurred, sending a second message to alter the resources while avoiding establishing a new label switched path within EMPLS portion of the network and tearing down and establishing path for the non-enhanced MPLS portion of the network within a structure of the claim. These features are claimed in the independent claim 11 and render it allowable. The prior arts in the record, also, fail to teach or make obvious to a router comprising a reserver using aggregated resource reservation protocol to reserve resources along the label switched path for packets of different flows that correspond to the same forwarding equivalence class within a structure of the claim. These features are

claimed in the independent claim 15 and render it allowable. The prior arts in the record, also, fail to teach or make obvious to a router comprising a reserver transmitting a message for reserving resource that includes a second label including a different value in an extra bit field to differentiate the second label from the first label within a structure of the claim. These features are claimed in the independent claim 23 and render it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
